

MATTHIEU LE GALL

AI & Big Data Engineering graduate, passionate about data technologies applied to sports. 2 years of professional experience and 4 years of apprenticeship experience working on data engineering and artificial intelligence projects.

SKILLS

- **Data Engineering:** ETL, data pipelines, REST APIs, web scraping, SQL, process automation, data modeling and structuring
- **Data Analytics & AI:** Machine Learning / Deep Learning, data preparation and analysis, model optimization
- **Data Visualization:** Power BI, Tableau, Qlik Sense, Streamlit, RShiny
- **Cloud & Data Platform:** Microsoft Fabric, AWS (currently upskilling)
- **Technologies:** Python, SQL, R, Power Query, PostgreSQL, Git, Docker, DBT, DuckDB
- **Football Data Sources:** Opta, StatsBomb, SkillCorner, Wyscout, Gradient

WORK EXPERIENCE

- **Data Scientist / Data Scout - Standard Liège, Belgium** *PRESENT*
 - Design and industrialization of scalable and automated scouting data pipelines (StatsBomb, SkillCorner): ingestion, transformation and consolidation of multi-source data, automation of ID matching and harmonization workflows, and structuring of datasets for recruitment and performance analysis. Development of data tools and player evaluation models to support data-driven sporting decisions.
- **BI Project Manager - Datatim, Rennes, France** *2024 - 2025*
 - Management of data quality and reliability within a Microsoft environment, supervision of data flows and automation of control processes. Design of dashboards and reporting solutions tailored to business needs. Technology watch and experimentation around Data & AI solutions.
- **Data Scientist Apprentice - French Ministry of Armed Forces, Bruz, France 3 years - Supervisor: M. Moez Baccouche, Ph.D.** *2021 - 2024*
 - Design of AI proof-of-concepts in Machine Learning, NLP and Deep Learning: semantic matching between CVs and job descriptions, object detection on satellite imagery, and speech recognition systems.
- **Data Scientist Intern - Parma Calcio 1913, Parma, Italy** *2023*
4-month internship - Supervisor: M. Sébastien Coustou
 - Design and implementation of a football players' market value estimation model within an AWS environment: data extraction and preparation using SQL, development and optimization of a Machine Learning model, hyperparameter tuning, and creation of an interactive Streamlit application for data visualization and result analysis.
- **Volunteer Data Analyst - Vannes OC, Vannes, France** *2022 - 2023*
1 year - Supervisor: M. Sullivan Coppalle
 - Design of data processing pipelines and automation of football players' GPS data flows, with development of Power BI dashboards dedicated to performance monitoring and sports analytics.
- **Data Analyst Apprentice - Union Sport & Cycle, Paris, France** *2020 - 2021*
1-year apprenticeship - Supervisor: M. Jean-Philippe Frey
 - Design of quantitative surveys, structuring and analysis of collected data, development of reporting solutions and Power BI dashboards to support reporting and decision-making.

EDUCATION

- **Engineering Degree in Computer Science - Big Data & AI** *2021 - 2024*
CNAM Engineering School, Niort
- **University Diploma in Statistics and Business Intelligence** *2019 - 2021*
IUT Paris Descartes - Paris
- **Scientific Baccalaureate - European English Section** *2016 - 2019*
Saint Paul High School, Vannes

ACHIEVEMENTS

Research competition at the Opta Forum 2024 organized by Stats Perform:

- Winner in the "event data" category with the project "Analysis of the Impact of Throw-ins in Modern Football".
- Presentation of the results on stage during the Opta Forum 2024 in London.
